

Preparation Enfora GSM Modem

Please notice, that the modem only works with SIM card, which the PIN inquiry is deactivated.

1. Please insert the SIM card in the modem
2. Connect the Antenna
3. Connect the PowerPack to the modem, after this to the powersupply.

Now is the modem ready for connection to the SMS Controller.

Function test:

Please connect the AC/DC Adapter (Power supply) to the modem.

After some seconds, the green LED begins to flash.

After successful registration in the GSM net the green LED shines durably.

If the login to the GSM net should not function (green LED flashes durably):

- Check, whether the pin inquiry from the SIM card is deactivated
- Change the location of the antenna
